FOR IMMEDIATE RELEASE November 16, 1981

MONTHLY SEISMIC CREW COUNT (Month of October, 1981)

For the first time in thirty consecutive months, the total number of seismic land crews and marine vessels searching for oil and gas in the U.S. and U.S. waters has recorded a decline. According to the Society of Exploration Geophysicists' monthly count of seismic crews, the October total was 741, down three crews from September.

The October total (741) represents a decrease of one-half of one percent from last month, a 30% increase over October, 1980, a 70% increase over October, 1979, a 100% increase over October, 1978, a 125% increase over October, 1977, a 178% increase over October, 1976, and a 175% gain over the same month in 1975.

During October, eight contractors were operating twenty of their 646 land crews and one of their forty-four vessels on a speculative basis.

MONTHLY SEISMIC CREW COUNT (Month of November, 1981)

The total number of seismic land crews and marine vessels searching for oil and gas in the U.S. and U.S. waters during November has declined for the second consecutive month. According to the most recent monthly survey by the Society of Exploration Geophysicists, the November total was 733, reflecting a decrease of eight land crews from the previous month.

The November total (733) represents a decrease of 1% from last month, a 28% increase over November, 1980, a 67% increase over November, 1979, a 99% increase over November, 1978, a 119% increase over November, 1977, a 167% increase over November, 1976, and a gain of 177% over the same month in 1975.

During November, eight contractors were operating twenty-three of their 638 land crews and two of their forty-five vessels on a speculative basis.

MONTHLY SEISMIC CREW COUNT

(Month of December, 1981)

During December, the total number of seismic land crews and marine vessels searching for oil and gas in the U.S. and U.S. waters declined by thirty, representing the largest single-month decline since the inception of the survey in May, 1974. According to the Society of Exploration Geophysicists' monthly report, the December total was 703 crews and vessels, compared with 733 in November.

The December total (703) represents a decrease of 4% over last month, a 38% increase over December, 1980, a 56% increase over December, 1979, a 96% increase over December, 1978, a 114% increase over December, 1977, a 146% increase over December, 1976, and a gain of 171% over the same month in 1975.

During December, ten contractors were operating thirty-two of their 613 land crews and one of their thirty-nine vessels on a speculative basis.

MONTHLY SEISMIC CREW COUNT

(Month of January, 1982)

The total number of land seismic crews and marine vessels searching for oil and gas in the U.S. and U.S. waters during January has declined for the fourth consecutive month. According to the Society of Exploration Geophysicists' monthly report, the January total was 695 crews and vessels, compared with 703 in December.

The January total (695) represents a decrease of 1% over last month, an 18% increase over January, 1981, a 48% increase over January, 1980, a 96% increase over January, 1979, a 112% increase over January, 1978, a 148% increase over January, 1977, and a gain of 176% over the same month in 1976.

During January, nine contractors were operating twenty-eight of the 599 land crews and one of the forty-six vessels on a speculative basis.

April 13, 1982

MONTHLY SEISMIC CREW COUNT (Month of March, 1982)

The total number of land seismic crews and marine vessels searching for oil and gas in the U.S. and U.S. waters during March declined by twenty-eight land crews and one marine vessel. A portion of the decline was due to poor weather conditions in some operating areas. According to the Society of Exploration Geophysicists' latest monthly report, the March total was 649, compared with 678 in February.

The March total (649) represents a decrease of 4% over last month, a 6% increase over March, 1981, a 36% increase over March, 1980, a 78% increase over March, 1979, a 94% increase over March, 1978, a 130% increase over March, 1977, and a gain of 170% over the same month in 1976.

During March, eleven contractors were operating twenty-two of the 554 land crews and four of the forty-five vessels on a speculative basis.

MONTHLY SEISMIC CREW COUNT (Month of April, 1982)

During April, the total number of seismic land crews and marine vessels searching for oil and gas in the U.S. and U.S. waters declined by twenty-three crews and vessels. According to the Society of Exploration Geophysicists' latest monthly report, the April total was 626, down twenty-six land crews but up three marine vessels from March.

The April total (626) represents a decrease of 4% over last month, a 3% decrease over April, 1981, a 26% increase over April, 1980, a 74% increase over April, 1979, an 83% increase over April, 1978, a 114% increase over April, 1977, and a gain of 163% over the same month in 1976.

During April, twelve contractors were operating twenty-nine of the 528 land crews and six of the forty-eight vessels on a speculative basis.

MONTHLY SEISMIC CREW COUNT (Month of May, 1982)

The total number of land seismic crews and marine vessels searching for oil and gas in the U.S. and U.S. waters during May declined by twenty land crews, but registered an increase of six vessels, for a net decrease of fourteen. According to the Society of Exploration Geophysicists' latest monthly report, the May total was 612, compared with 626 in April.

The May total (612) represents a decrease of 2% from last month, a 7% decrease from May, 1981, a 22% increase over May, 1980, a 60% increase over May, 1979, a 74% increase over May, 1978, a 103% increase over May, 1977, and a gain of 148% over the same month in 1976.

During May, thirteen contractors were operating twenty-six of the 508 land crews and three of the fifty-three vessels on a speculative basis.

MONTHLY SEISMIC CREW COUNT (Month of June, 1982)

For the first time since September, 1981, the total number of seismic land crews and marine vessels searching for oil and gas in the U.S. and U.S. waters has recorded an increase. The total number of land crews and vessels operating during June was 615, compared with 612 in May. The Society of Exploration Geophysicists' latest monthly report indicates the land crew total declined but was offset by an increase in marine vessels. The 69 vessels operating in June represent the largest number since the inception of the survey in May, 1974.

The June total (615) represents an increase of one half of one percent over last month, a 12% decrease from June, 1981, a 15% increase over June, 1980, a 52% increase over June, 1979, a 70% increase over June, 1978, a 102% increase over June, 1977, and a gain of 138% over the same month in 1976.

During June, seventeen contractors were operating thirty-three of the 503 land crews and seven of the sixty-two vessels on a speculative basis.

MONTHLY SEISMIC CREW COUNT

(Month of July, 1982)

The total number of seismic land crews and marine vessels searching for oil and gas in the U.S. and U.S. waters during July declined by nineteen land crews and three vessels during the last thirty days. According to the Society of Exploration Geophysicists' latest monthly report, the July total was 593, compared with 615 in June.

The July total (593) represents a decrease of 4% from last month, a 17% decrease from July, 1981, a 7% increase over July, 1980, a 46% increase over July, 1979, a 62% increase over July, 1978, an 88% increase over July, 1977, and a gain of 120% over the same month in 1976

During July, eleven contractors were operating twenty-six of the 484 land crews and eight of the fifty-eight vessels on a speculative basis.

MONTHLY SEISMIC CREW COUNT (Month of August, 1982)

During August, the total number of seismic land crews and marine vessels searching for oil and gas in the U.S. and U.S. waters declined by thirty-one. According to the latest monthly report from the Society of Exploration Geophysicists, the August total was 562, down twenty-seven land crews and four marine vessels since July.

The August total (562) represents a decrease of 5% from last month, a 24% decrease from August, 1981, a 1% decrease over August, 1980, a 33% increase over August, 1979, a 54% increase over August, 1978, a 72% increase over August, 1977, and a gain of 104% over the same month in 1976.

During August, thirteen contractors were operating thirty-two of the 458 land crews and eleven of the fifty-four vessels on a speculative basis.

MONTHLY SEISMIC CREW COUNT

(Month of September, 1982)

The total number of seismic land crews and marine vessels searching for oil and gas in the U.S. and U.S. waters during September declined by twenty-seven from the August total. According to the Society of Exploration Geophysicists' latest monthly report, the September total was 535, compared with 562 the preceding month.

The September total (535) represents a decrease of 5% from last month, a 28% decrease from September, 1981, a 6% decrease over September, 1980, a 24% increase over September, 1979, a 51% increase over September, 1978, a 67% increase over September, 1977, and a gain of 100% over the same month in 1976.

During September, eleven contractors were operating twenty-eight of their 434 land crews and eight of their fifty vessels on a speculative basis.
